# **Introduced by Senator Kehoe**

February 25, 2009

An act to add Article 13.5 (commencing with Section 25250.50) to Chapter 6.5 of Division 20 of the Health and Safety Code, relating to hazardous materials.

#### LEGISLATIVE COUNSEL'S DIGEST

SB 346, as amended, Kehoe. Hazardous materials: motor vehicle brake friction materials.

## **Existing**

(1) Existing law establishes the Department of Toxic Substances Control, in the California Environmental Protection Agency, with powers and duties regarding the management of hazardous waste. Existing law, administered by the Department of Toxic Substances Control department, prohibits the management of hazardous waste except in accordance with the hazardous waste control laws, including laws governing the removal of any mercury-containing vehicle light switch from a vehicle, and the regulations adopted by the department. A violation of the hazardous waste control laws is a crime.

This bill would require the Department of Toxic Substances Control department to conduct a baseline survey, on or before January 1, 2013, of the concentration levels of nickel, zinc, copper, and antimony in motor vehicle brake friction materials. The bill would require the department, commencing on January 1, 2013, and at least every 3 years thereafter, to monitor the concentration levels of those constituents nickel, zinc, and antimony in motor vehicle brake friction materials to ensure that those levels do not increase by more than 50% above the

 $SB 346 \qquad \qquad -2-$ 

baseline levels established through the baseline survey. In that case, the bill would require the department to—complete scientific studies to evaluate the need to establish a maximum concentration of any or all of these constituents in brake friction materials, and would authorize the department to establish a maximum allowable concentration for those constituents, as specified ask the State Water Resources Control Board or the Office of Environmental Health Hazard Assessment, as specified, to determine whether there is a need for controlling the use of the relevant constituent in brake friction material. If the department determines that there is a demonstrated need for controlling the use of the studied constituents in brake pads, the bill would require the department to prioritize the presence of those constituents in brake friction materials for regulation, as specified. The bill also would require the department to monitor copper.

#### **This**

The bill-would, commencing on January 1, 2014, would prohibit the sale of any motor vehicle brake friction materials containing specified constituents, including, but not limited to, cadmium, lead, and mercury, in amounts that exceed certain concentrations. The bill-would, commencing on January 1, 2023 2021, would restrict the concentration of copper in motor vehicle brake friction materials sold in California, as specified. The bill, commencing on January 1, 2014, would require all manufacturers of friction materials used in brakes on new motor vehicles, or as replacement parts, that are sold in this state to obtain a certification of compliance with these requirements from a 3rd party testing agency, and to mark proof of certification on the friction materials. Any violation of the certification requirements would be subject to remedies and penalties provided for acts of unfair competition. The bill would require the Department of Toxic Substances Control department to enforce these provisions, and would require the department to remove from sale any brake friction materials determined to be not in compliance. A violation of these provisions would be subject to a civil fine of up to \$10,000 per violation. Because a violation of these provisions would also be a crime pursuant to the hazardous waste control laws, the bill would impose a state-mandated local program.

The bill would require the department, commencing on January 1, 2011, to impose a fee of \$1 on each new axle brake set sold in the state, whether fitted to a new vehicle or solid separately, and would authorize the department, commencing on January 1, 2015, and after consulting interested parties, to-establish a adjust the fee-on each new axle brake

-3- SB 346

set sold in this state at to a level sufficient to fully implement these provisions. The bill would require the fee to be used to cover specified costs related to copper and other constituents in brake friction materials. The

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Vote: majority. Appropriation: no. Fiscal committee: yes. State-mandated local program: yes.

The people of the State of California do enact as follows:

- 1 SECTION 1. The Legislature finds and declares all of the 2 following:
  - (a) Friction materials are an essential component of motor vehicle brake systems and of critical importance to transportation safety and the public safety in general.
  - (b) Debris from friction materials are generated and released to the surrounding environment in the course of normal brake system operation.
  - (c) Brake friction materials on motor vehicles are known to contain constituents, including copper, that have been proven to be harmful when found in significant quantities in the environment, and are regulated as part of a system of laws and regulations intended to prevent pollution and preserve the environment.
  - (d) Consistent with the critical role brake systems play in transportation safety, limits on those harmful constituents are necessary to protect and enhance California's environment.
  - (d) Limits on the harmful constituents in brake friction materials are necessary to protect and enhance California's environment.
  - (e) Limits on the copper content of brake friction materials are necessary for compliance with copper water quality standards and successful implementation of copper total maximum daily loads in California's urban watersheds.
  - (f) Changes in the composition of brake friction materials made to protect and enhance California's environment should meet all applicable safety standards.

SB 346 —4—

(g) Manufacturers of brake friction materials—shall should use due diligence to ensure that formulations that replace copper in brake friction materials are less harmful to public health and the environment.

SEC. 2. Article 13.5 (commencing with Section 25250.50) is added to Chapter 6.5 of Division 20 of the Health and Safety Code, to read:

### Article 13.5. Motor Vehicle Brake Friction Materials

- 25250.50. For purposes of this article, the following-definition definitions apply:
  - (a) "Board" means the State Water Resources Control Board.
- (b) "Department" means the Department of Toxic Substances Control.
- (c) "Motor Vehicle" has the same meaning as "vehicle" is defined in Section-415 670 of the Vehicle Code.
- (d) "Testing agency" means an agency approved by the department as qualified and equipped for the testing of products, materials, equipment, and installations in accordance with nationally recognized standards.
- 25250.52. (a) On and after January 1, 2018, any newly reengineered motor vehicle models fitted with brake pads containing friction materials that exceed 5 percent copper by weight shall not be sold in this state.
  - (b) On and after January 1, 2023, any motor vehicle brake
- 25250.52. (a) On and after January 1, 2021, any motor vehicle brake friction materials exceeding 5 percent copper by weight shall not be sold in this state.

<del>(e)</del>

- (b) On and after January 1, 2032, any motor vehicle brake friction materials exceeding 0.5 percent copper by weight shall not be sold in this state.
- (c) Manufacturers of vehicles and vehicle brake friction materials shall monitor and provide two reports to the department on the reduction of the concentration level of copper in motor vehicle brake friction materials. The first report shall be due on or before January 1, 2016, and the second report shall be due on or before January 1, 2018.

\_5\_ SB 346

1 25250.54. On and after January 1, 2014, any motor vehicle 2 brake friction materials containing any of the following constituents 3 in an amount that exceeds the following concentrations shall not 4 be sold in this state:

- (a) Cadmium and its compounds: 0.01 percent by weight.
  - (b) Chromium(VI)-salts: 0.1 percent by weight.
- (c) Lead and its compounds: 0.1 percent by weight.
- (d) Mercury and its compounds: 0.1 percent by weight.
  - (e) Asbestiform fibers: 0.1 percent by weight.
- 25250.56. (a) On or before January 1, 2013, the department shall conduct a baseline survey of the concentration levels of nickel, zinc, *copper*, and antimony in motor vehicle brake friction materials. Commencing *on* January 1, 2013, and at least every three years thereafter, the department shall monitor the following constituents to ensure that concentration levels of those constituents in motor vehicle brake friction materials do not increase by more than 50 percent above the baseline levels established through the baseline survey::
  - (1) Nickel and its compounds.
  - (2) Zinc and its compounds.

- (3) Antimony and its compounds.
- (b) If monitoring results show that concentration levels have increased by more than 50 percent above the baseline levels, the department shall complete scientific studies to evaluate the need to establish a maximum concentration of any or all of these constituents in brake friction materials. All studies and surveys conducted by the department shall be subject to public review and comment.
- (c) If the department determines that the scientific studies demonstrate the need for controlling the use of the studied constituent in brake pads, the department shall establish a maximum allowable concentration for that constituent, by regulation adopted pursuant to Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.
- 36 (b) In the monitoring required by subdivision (a), the department also shall monitor copper.
  - (c) If monitoring results for zinc show that concentration levels have increased by more than 50 percent above the baseline levels, the department shall ask the board to use published data from

SB 346 -6-

scientific literature to estimate the relative contribution of zinc from brake friction materials to the total quantity of zinc in urban runoff. On the basis of this estimate, the board shall determine whether there is a need for controlling the use of zinc in brake friction material.

- (d) If monitoring results for nickel show that concentration levels have increased by more than 50 percent above the baseline levels, the department shall ask the board to use published data from scientific literature to estimate the relative contribution of nickel from brake friction materials to the total quantity of nickel in urban runoff. On the basis of this estimate, the list adopted as required by Section 303(d) of the federal Clean Water Act (33 U.S.C. Sec. 1313(d)), and available water quality monitoring data, the board shall determine whether there is a need for controlling the use of nickel in brake friction material.
- (e) If monitoring results for antimony show that concentration levels have increased by more than 50 percent above the baseline levels, the department shall ask the Office of Environmental Health Hazard Assessment to review scientific literature to determine whether there is a need for controlling the use of antimony in brake friction material.
- (f) All studies and surveys conducted by the department under this section shall be subject to public review and comment.
- (g) If the department determines that the scientific studies demonstrate the need for controlling the use of the studied constituents in brake pads, the department shall prioritize the presence of the studied constituents in brake friction materials for regulation pursuant to Section 25252.
- (h) Vehicle brake manufacturers shall follow an alternative evaluation process, for the studied constituents in brake pads, adopted by the department pursuant to Section 25253.
- 25250.58. The following motor vehicle classes and brakes are exempt from this article:
  - (a) Military combat vehicles.
- (b) Vehicles employing internal closed oil immersed brakes, or a similar brake system that is fully contained and emits no copper, other debris, or fluids under normal operating conditions.
- (c) Totally sealed brakes used for the primary purpose of holding the vehicle stationary, and not designed to be used while the vehicle is in motion.

\_7\_ SB 346

(c) Brakes designed for the primary purpose of holding the vehicle stationary and not designed to be used while the vehicle is in motion.

- 25250.60. (a) Commencing *on* January 1, 2014, all manufacturers of friction materials used in brakes on new motor vehicles, or as replacement parts, that are sold in this state shall obtain a certification of compliance with the requirements of Sections 25250.52 and Section 25250.54 from a third party third-party testing agency. Proof of certification shall be marked on the friction materials.
- (b) Any violation of subdivision (a) is an act of unfair competition subject to all remedies and penaltics provided by Chapter 5 (commencing with Section 17200) of Part 2 of Division 7 of the Business and Professions Code.
- (b) Commencing on January 1, 2021, and until December 31, 2031, all manufacturers of friction materials used in brakes on new motor vehicles, or as replacement parts, that are sold in this state shall obtain a certification of compliance with the requirements of subdivision (a) of Section 25250.52 and Section 25250.54 from a third-party testing agency. Proof of certification shall be marked on the friction materials.
- (c) Commencing on January 1, 2032, all manufacturers of friction materials used in brakes on new motor vehicles, or as replacement parts, that are sold in this state shall obtain certification of compliance with the requirements of subdivision (b) of Section 25250.52 and Section 25250.54 from a third-party testing agency. Proof of certification shall be marked on the friction materials.
- (d) Manufacturers of friction materials used for brakes on new motor vehicles, or as replacement parts, may obtain certification of compliance with the requirements of subdivision (a) or (b) of Section 25250.52 or Section 25250.54 at any time.
- (e) The department, in consultation with all interested parties, and on or before January 1, 2011, shall develop all certification and marking criteria required pursuant to this section.

36 <del>(e)</del>

(f) Commencing on January 1, 2014, vehicle manufacturers and retailers of friction materials shall ensure that only brakes certified for sale in this state are offered for sale in this state.

SB 346 —8—

25250.62. (a) Any-A violation of this article, including, but not limited to, the falsification of third party third-party certification, by vehicle manufacturers, brake pad manufacturers, distributors, or retailers, shall be subject to a civil fine of up to ten thousand dollars (\$10,000) per violation.

(b) The department shall enforce this article. The department shall remove from sale in this state any brake friction materials determined to be not in compliance with this article.

25250.64. (a) After consulting interested parties, the department shall establish a

25250.64. (a) Commencing on January 1, 2011, the department shall impose a fee of one dollar (\$1) on each new axle brake set sold in the state, whether fitted to a new vehicle or sold separately.

- (b) Commencing on January 1, 2015, and after consulting interested parties, the department may adjust the fee on each new axle brake set sold in this state, whether fitted to a new vehicle or sold separately,—at to a level sufficient to fully implement this article. The fee shall be assessed commencing on and after January 1, 2011.
- (b) The fee-may shall only be used to cover costs for outreach, administration, fee collection, enforcement, monitoring, mitigation, and control measures related to copper and other constituents in brake friction materials.
- (c) Not more than 5 percent of the fees collected pursuant to this section shall be used to offset accounting costs incurred—by retailers for fee collection.
- (d) Funds for outreach may be allocated by the department to trade associations associated with the manufacture and sale of brake friction materials for purposes of outreach to, and education of, their memberships.

<del>(d)</del>

- (e) The department shall consult with the board prior to allocating funds to, or implementing any provisions of this article relating to, motor vehicle brake friction materials constituent monitoring, mitigation, or control measures.
- SEC. 3. No reimbursement is required by this act pursuant to Section 6 of Article XIIIB of the California Constitution because the only costs that may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, eliminates a crime or infraction, or changes the penalty

\_9\_ SB 346

for a crime or infraction, within the meaning of Section 17556 of the Government Code, or changes the definition of a crime within the meaning of Section 6 of Article XIII B of the California Constitution.
